## *Confidence redefined, one smile at a time.*

**He first came to us as a child after a traumatic accident  
left his front teeth fractured.**

**More than the broken tooth, it was the underconfidence that left a lasting mark.  
Years later, he returned – not because something was wrong,  
but because he had grown.**

**He wanted a smile that looked more natural, more aesthetic,  
and more aligned with the confident person he had become.**

**This is what smile transformations are truly about –  
not just repairing teeth, but restoring self-belief  
and helping people step forward with renewed confidence.**

*Confidence redefined, one smile at a time.*

## Treatment Done

### 1. Pre-Treatment

He was concerned about the appearance of his front teeth that affected his smile and confidence.

### 2. Smile Test Drive

We simulated his future smile using digital tools, helping him visualize the result and feel confident in the treatment plan.

### 3. Final Prosthesis

Custom ceramic veneers were placed—upper 8 in number to create a balanced, natural smile.

*Confidence redefined, one smile at a time.*

# Technology

---

**2-D  
Smile  
Simulation**

**The  
3-D  
Simulation**

**The  
End  
Result**

*Confidence redefined, one smile at a time.*

---

# Outcome

---

**Patient Talks :**

“

**I got a  
bright new  
smile..  
which doesnt  
even look like  
it's different ..  
just how I wanted it!**

”
