## *A milestone journey, crowned with a radiant smile.*

For over 20 years, Jagruti's family has trusted our team. She came to us feeling underconfident about her smile and struggling with severe jaw pain from teeth clenching. With treatment, her pain reduced by 90% overnight, and she finally enjoyed restful sleep.

Excited about veneers, she tried our 3D smile simulation, which showed her exactly how her new smile would look — boosting her confidence to take the next step.

Her journey is proof that dentistry goes beyond teeth — it restores comfort, confidence, and joy.

*A milestone journey, crowned with a radiant smile.*

## Treatment Done

**1. Pre-Treatment**  
She was concerned about the appearance of her teeth that affected her confidence.

**2. Smile Test Drive**  
The patient was unsure if veneers would truly enhance her face. Through a 3D Smile Simulation, she was able to preview her future smile digitally — giving her the confidence to move ahead with treatment.

**3. Final Prosthesis**  
A radiant smile was enhanced with 10 custom-made veneers, carefully designed to bring harmony, balance, and confidence to her look.

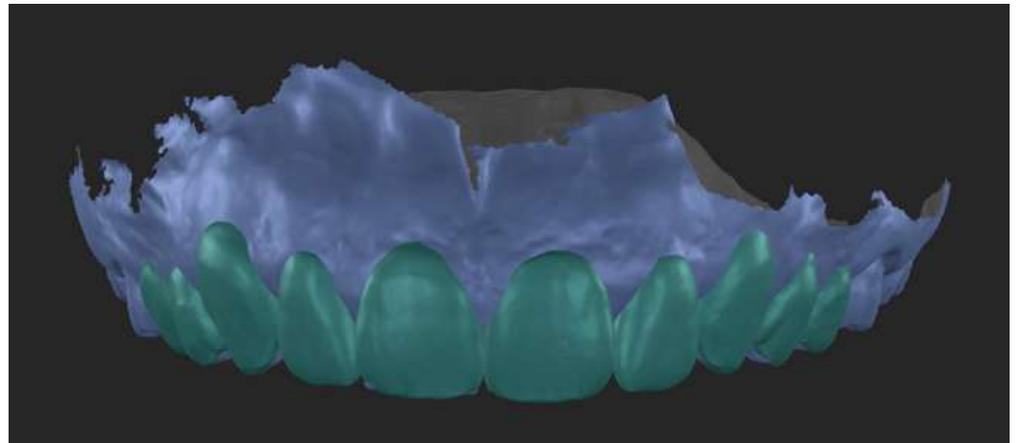

*A milestone journey, crowned with a radiant smile.*

# Technology

**The  
Crown Lengthening  
Procedure  
Guide**

**The  
3-D  
Simulation**

**The  
End  
Result**

*A milestone journey, crowned with a radiant smile.*

---

# Outcome

---

**Patient Talks :**

“

**My smile is now  
a perfect 10,  
and I no longer  
struggle with  
jaw clenching.**

**That makes  
me  
truly happy.**

”
