Goodbye Gaps, Hello Glam!

The Starting Point

At 23, our patient walked in with noticeable gaps between his teeth — and a smile he struggled to feel confident about. The spaces weren't just cosmetic; they affected his self-esteem and made him self-conscious about his appearance. He often found himself hiding his smile in social situations, holding back instead of shining.

Goodbye Gaps, Hello Glam!

Treatment Done

Alignment Correction

Clear aligners helped close the gaps, paving the way for a more precise and minimally invasive smile design.

Gums in Shape

Gum contouring was done with the final tooth proportions in mind.

Smile Designed

Every detail was planned to match his facial features and style.

Aesthetic Boost

The final result: a confident, natural-looking, gap-free smile.
